To Whom It May Concern:

I am writing to you on behalf of the students, staff, and faculty at Dakota County Technical College to thank you for developing such a beneficial program for our students.

Our day with the Save A Life Tour was a complete success. Brian and his staff were enthusiastic, professional, knowledgeable, and passionate about the importance of “taking the keys” and keeping your friends and family safe.

Their powerful message and personal stories created an approachable atmosphere that appeals to students of all ages and backgrounds. Unless you have personally experienced loss through drunk driving, I truly do not believe you understand the impact it may cause you, your family, and your friends. The Save A Life Tour provides realistic information and experiences that students can take with them and apply to life situations.

If the Save A Life Tour can reach one, two or all of the participants, your organization and all of those involved, should be commended for saving lives!

The Save A Life Tour was outstanding and provided a unique, hands-on educational experience about the dangers of drunk driving to our students. I would highly recommend the Save A Life Tour to any organization impacted by drunk driving.

Once again, thank you – the Save A Life Tour was a great success!

Sincerely,

Nicole Meulemans
